

Installation Guide

12W RGBW Landscape Spot Light · Model JXL-HW-D08

Before You Begin

Turn off power at the breaker before making any electrical connections.
Confirm the low-voltage transformer output does not exceed 12V for this fixture.

Mounting

1. Select a mounting location with a clear, unobstructed view of the target area.
2. Insert the ground stake fully into soil, or use the surface-mount base on hardscape.
3. Adjust the 180-degree head to the desired angle and tighten the locking collar.

Wiring

1. Strip 1/2 inch of insulation from each low-voltage lead.
2. Connect to the landscape cable using waterproof wire connectors.
3. Bury cable runs at least 6 inches deep, away from foot traffic.

Testing

Restore power and confirm the fixture illuminates before backfilling soil.
